## AGREEMENT

Contractor: \_\_\_\_\_  
Address: \_\_\_\_\_  
City, State, Zip: \_\_\_\_\_

INFORMATION: Under current O.S.H.A. regulations, Subpart N, 1926.550 states the following regarding personnel platforms used in conjunction with cranes:

(2) General requirements. The use of a crane or derrick to hoist employees on a personnel platform is prohibited, except when the erection, use, and dismantling of conventional means of reaching the work site, such as a personnel hoist, ladder, stairway, aerial lift, elevating work platform or scaffold, would be more hazardous, or is not possible because of structural design or worksite conditions.

It is hereby agreed that the "Contractor" named above has made the determination that any other means of elevating personnel (other than by means of using a crane and personnel platform) would be more hazardous or impossible in accordance with the O.S.H.A. guidelines stated above.

The "Contractor" also agrees to save harmless and defend Champion Crane Service, Inc. from any action brought about by any branch of O.S.H.A. in conjunction with the use of personnel platforms and whether or not any other means would be less hazardous or possible. The "contractor" also agrees to permit the operator of the crane to comply with all other O.S.H.A. regulations pertaining to personnel platforms at all times.
